# Overview...

## The EXO-PRO

The EXO-Pro is truly perfect for the motorsport enthusiast or driver alike, Taking style cues directly out of race cars, as well as the accurate seating positions, we're able to provide the most accurate, true to life driving experience possible.

Using custom hardware, designed and manufactured by race engineers, and custom software, designed and developed in conjunction with race teams, we can customise each simulator to replicate real world cars with precision accuracy, from seating positions and steering wheels to software physics.

"If everything seems under control, you're not going fast enough."

- Mario Andretti

## Features

- > EXO-PRO Professional Racing Chassis
- > EXO-Cage Ready
- > 16Nm Direct Drive Steering System
- > Custom GT3 P310 With Inbuild Data Dash
- > HE-Ultimate 3 Pedal Set
- > Optional Sequential Shifter
- > 3x Full HD 27" Anti Glare Gaming Monitors
- > Interchangable Monitor System
- > Genuine Sparco Seat
- > Custom High End PC
- > Preloaded and Configured with rFactor1\*, rFactor2\* & iRacing
- > 3 months Software support for tyre / physics modelling
- > Inbuilt 2.1 Sound System
- > Onboard Surge Protection
- > 12 Month Warranty
- > Remote Support
- > Worldwide Delivery

\*ferrari livery for demonstration only

## The EXO-PRO Chassis

The EXO-PRO Chassis has been designed in conjunction with Australia's leading designers and chassis builders PACE Innovations. We've incorporated everything any simulator needs, and then more. Each section of the simulator is interchangeable to allow for different seating positions, pedal positions, steering systems & screen systems. the EXO-Cage allows for a removable back section to help emulate different types of race cars. Our EXO-Screen System is revolutionary in the sense it allows you to adjust the steering wheel height and screen height at the same time, keeping your eye line perfect in relation to the screens, creating the best experience.

"Auto racing began 5 minutes after the second car was built"  
- Henry Ford

### Seat & Pedal Pods

The seat & pedals mount to a removable frame, allowing them to be changed to suit the needs of the driver, we can accommodate for everything from Supercars and GT3s, to Formula Fords, F1s & LMP Cars.

### EXO-Cage

The EXO-Cage is a unique, removable tube structure mounted to the back of the simulator. The cage can be used for aesthetics, to assist in getting in and out, or to even fully enclose and black out the simulator, the options are endless!

### Screen System

Our unique screen system allows for easy upgrade in the future, allowing seamless transition to larger screens, or even curved projection. Additionally, when adjusting the steering wheel up or down, the screens easily move, assisted by a gas strut, to keep the perfect eye line and perspective, no matter what the drivers height.

## The EXO-PRO Hardware

The EXO-PRO has been fitted with the most robust, reliable and realistic hardware in the world, to ensure that your simulator lasts a life time, and the feeling you get through out each component is as accurate to the real world as possible.

We have an incredible range of hardware to cater for a range of race cars.

Each item is customizable and interchangeable on the fly. Everything from steering wheels, to pedal pads are customizable, allowing us to replicate race cars accurately.

"Aerodynamics are for people who can't build engines"

- Enzo Ferrari

### Steering System

We have a range of steering systems, the flagship being our Direct Drive Servo Steering System. containing two separate components, Control Box & Motor, this ensures a peak of 18Nm of torque from the motor. Along with no hard stops or breakable mechanical parts, this ensures an accurate replication of real world steering forces and accuracy.

### Pedal System

Our 3 pedal system uses load cells across all 3 pedals, ensuring longevity, and precise pedal control. With 5000 steps of resolution per pedal, along with ultimate adjustability, everything from pedal travel, brake feeling and stiffness and even clutch plate grab points can be adjusted for ultimate accuracy.

### High End PC

Our systems use a custom built high end PC, specified to provide amazing visuals and lightning performance. Preloaded with all the best software, as well as a custom interface for support, control modification and difficulty settings.

## The EXO-PRO Software

Our systems use a custom built high end PC, with an i5 processor, GTX 1000 series graphics and dual solid state hard drives to provide amazing visuals and lightning performance. Preloaded with all the best software, as well as a custom interface for support, control modification and difficulty settings.

You have the freedom to add your own racing games as you wish! And as always we have an amazing support team ready to help!

"We broke something, I think it was traction..."

- Carl Edwards

### rFactor 1 & 2

rFactor 1 & 2 have been at the front of simulation for the past 10 years. rFactor 1 is well known for the huge unrivalled variety of cars and tracks, and rFactor2 for its world class physics, tyres & weather modelling. Our software developers will work together with you, to create, modify and adjust physics, and tyre modelling to make sure you're getting the most accurate simulation.

### iRacing

iRacing is the top line for online racing and driver training around the world, but offers no adjustment to motorsport teams and developers, and has a limited car and track selection. iRacing is perfect for someone who wants to strap in for a quick race with some people from around the world.

### Choose your own

All our simulators are ready to go with all other major PC titles, all you need to do is assign the controls. Don't forget, we are here to help and can talk you through it if you get stuck.

## The EXO-PRO Pricing

See below our pricing, keeping in mind that every single aspect of our simulators are customizable. We've put together what we think to be the best 3 packages we can offer. If you need a custom simulator moulded to a specific car, or different controls, one of our support team will be happy to spec up your "perfect simulator" don't hesitate to get in contact with us to discuss your needs.

"I don't make mistakes. I make prophecies which immediately turn out to be wrong."  
- Murray Walker

### EXO-PRO 1

- > EXO-PRO Professional Racing Chassis
- > EXO-Cage Ready
- > Race Livery
- > 16Nm Direct Drive Steering System
- > Custom GT3 P310 With Inbuilt Data Dash
- > Ultimate 3 Pedal Set
- > Optional Sequential Shifter
- > 3x Full HD 27" Anti-Glare Gaming Monitors
- > Genuine Sparco Seat
- > Custom High End PC
- > Exotic Custom Software Package
- > 3 Months Software Support
- > Inbuilt 2.1 Sound System
- > Onboard Surge Protection
- > 12 Month Warranty
- > Remote Support

**\$37,900**

### EXO-PRO 2

- > EXO-PRO Professional Racing Chassis
- > EXO-Cage Ready
- > Race Livery
- > Fanatec CSW V2 Steering Base
- > BMW GT2 Steering Wheel
- > Fanatec V3 Pedals
- > Optional Sequential Shifter
- > 3x Full HD 27" Anti-Glare Gaming Monitors
- > Genuine Sparco Seat
- > Custom High End PC
- > Inbuilt 2.1 Sound System
- > Onboard Surge Protection
- > 12 Month Warranty
- > Remote Support

**\$19,400**

### EXO-PRO 3

- > EXO-PRO Professional Racing Chassis
- > EXO-Cage Ready
- > Logitech G29 Steering & Pedal System
- > Optional Sequential Shifter
- > 3x Full HD 27" Anti-Glare Gaming Monitors
- > Genuine Sparco Seat
- > Custom Mid End PC
- > Inbuilt 2.1 Sound System
- > Onboard Surge Protection
- > 12 Month Warranty

**\$14,300**
